

INDUSTRIAL PACKAGING SERVICES

- Package Designing / Repacking Services
- Inner Packing Services
- Wooden Packing Services
- Metal Barrier Foil
- Vacuum Packing Services
- Thermostatic Packing Services
- Heavy Duty Shrink Wrap Services
- Misc packaging and lashing services

Inner Packing Services

At FLS we pay great attention to inner packing as we strongly believe appropriate inner packing / braising / blocking is critical to the safety of the cargo.

Most commonly used inner packing material include:

- ❖ Bubble wraps
- ❖ Shrink wraps
- ❖ Thermocols
- ❖ Foams
- ❖ Corrugated sheets
- ❖ Padded timbers
- ❖ Air bags
- ❖ Dunnage bags
- ❖ Polyester straps

We use wide range of other cushioning materials to protect valuable cargo against shock, vibration, abrasion, corrosion and electrostatic discharge etc , while in transit or storage.

Samples of Inner Packings

Wooden Packing Services

FLS manufactures wide range of timber/wood packing products, right from small packets/boxes/ crates to huge shipping containers

We are equipped with the latest machines inclusive of the facility to manufacture collapsible no nail boxes

All boxes are designed as per customers specification and compatible for multiple handling with forklifts, cranes, trolley and other handling equipment

All wood materials are heat treated

Fumigation services provided as per specific need of customers

Sample Wooden Packages Manufactured by FLS Team

Metal Barrier Foil

FLS provides aluminum barrier foil packaging for industrial products with varied specifications

Metal barrier foil packing services are offered to protect shell against oxidizing, corrosion and moisture damage.

The heat sealable product is an effective packaging solution for metal parts and equipment to ensure total climatic protection during transit and storage.

Vacuum Packing Services

Vacuum packing reduces atmospheric oxygen inside the package resulting in better protection against moisture, dirt, dust, salt and damaging effects of sunlight

It provides an excellent barrier against damages caused by the atmospheric interference especially oxidizing and corrosion.

Vacuum packing is a preservation process inside a vapor-tight barrier with desiccants (silica-gel).

It creates a secured atmosphere within the package

Desiccants are placed inside the airtight envelope to absorb any remaining humidity in the atmosphere.

Humidity indicators can also be installed within the barrier bag to monitor the integrity of the atmosphere

Sample Vacuum Packing by FLS Team

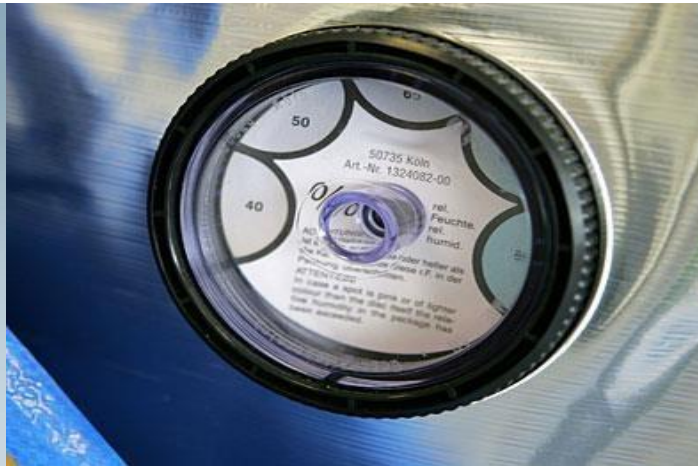

Thermostatic Packing Services

Each package is developed for the cargo it protects by considering the specific ambient conditions, temperature parameters and transit distances and durations

Keeping this in mind FLS works closely with its clients to develop the best solution for their requirements

These packages can also be fitted with temperature/humidity indicators to record their effectiveness.

Vapor Corrosion Inhibitors Packing

Vapor Corrosion Inhibitors are corrosion inhibiting compounds which when released into a close enclosure forms a very thin molecular layer on the metal surface which inhibits corrosion by preventing air and moisture from coming in contact with the metal surface.

Core benefits of VCI packing includes:

- ❑ Easy to apply
- ❑ Good at protecting metals
- ❑ Keep the metals dry for longer period
- ❑ Save time and cost.

Vapor Corrosion Inhibitors Packing by FLS Team

Heavy Duty Shrink Wrap Services

FLS use PVC, Polyethylene, Polyolefin and heavy duty shrink materials to wrap and protect heavy duty and ODC cargo

Shrink wrap is applied and shrunk using a propane fired heat tool; shrinking it tightly and fully encasing the piece of machinery.

We use Dr. Shrink's premium shrink wrap material to offer complete protection against weather damages

All shrink materials we use is 100% virgin resin which ensure consistent mil thickness

Samples of Heavy Duty Shrink Wrap by FLS Team

AUTO MOBILE PACKING AND LASHING

FLS packaging experts can also very much expertise to do the car packing and lashing as we have in-house facilities to pack with Bubble and plastic sheets and lash the car in containers with ratchet and cord strap belts.

Our Packing & lashing services for this segment include protective layers and secured packing for all types of commercial & Military vehicles We specialize in packing of heavy duty & luxury cars:

- Single cars in container &
- Multiple cars in container
